FabianVillasenor.com   **linkedin.com/in/FabianVillasenor**   **github.com/EndingNever**

Technical Skills

- Front end experience with React, Javascript, JSX, Angular, SASS, Styled Components, CSS Modules, React Router, React Context, Redux, TypeScript, Firebase
- Hands on backend experience with Node.js, Express, Insomnia, MySQL, jsonwebtoken, custom REST APIs, Fakestore API, OMDb API
- Experience with Github operations in a team, including team organization and communication, and managing merge conflicts

Projects

Tesla Shop Recreation   https://endingnever.github.io/groupproject/

Recreation of the Tesla shop, including a small product database. Worked in a team of four, with successful github merges including resolution of conflicts

Mixellence   https://github.com/OxanaSF/mixellence

Website for a business which provides a bartender service. The site has a front end viewable by potential clients and an administrator dashboard only accessible with a password. The admin can change text and photos in the page without any code, through the use of Firebase.

React Card Game https://endingnever.github.io/ReactGame/

Javascript heavy card game based on Kings Corner. A card can only be placed on another whose value is one higher. Eleven different arrays, each with their own state, are managed with the React useState hook.
